- Critical Thinking
- Teamwork & Collaboration
- Leadership
- Presentation / Training

TECH SKILLS

- Languages: JavaScript/TypeScript (Node.js, React), Dart (Flutter), PHP, Python, HTML5, CSS3, SQL
- Frameworks & Tools: Flutter, Node.js/Express, RESTful APIs, Git, AWS (S3), Azure, Kinsta, Claude AI, Microsoft 365
- Databases: MongoDB Atlas, MySQL, PostgreSQL, MariaDB, Microsoft SQL
- DevOps: LAMP/LEMP/NGINX, Ubuntu, Cloud Services, SSL/DNS, CI/CD Basics
- Other: Full-Stack Architecture, Agile, Responsive Design, API Integrations

PROFILE

Dynamic Full-Stack Software Engineer skilled in Flutter (Dart), Node.js, MongoDB Atlas, AWS S3, and end-to-end application architecture. Founder of IterDev LLC and solo developer of KeenReads.app (launched MVP in ~4.5 months). Expert at designing scalable systems, integrating APIs, and leveraging AI tools (Claude) for rapid, high-quality delivery. Creative problem-solver who blends deep technical logic with clear communication and ownership to build impactful, user-centered products.

WORK EXPERIENCE

Sep 2025 – Jan 2026 KeenReads.app

Founder & Sole Developer (MVP Launch)

- Built and launched cross-platform app (Flutter frontend, Node.js API, MongoDB Atlas, AWS S3) from scratch in ~4.5 months solo.
- Owned full lifecycle: architecture, development, deployment, and AI-assisted optimization (Claude Opus/Sonnet).
-

2024 – Present IterDev LLC

Founder & Lead Full-Stack Engineer

- Delivered full-stack consulting: custom APIs, scalable web solutions, and modern integrations for clients.

2016 – 2025 Nzymes.com (Biopet Inc.)

Development Operations & Full-Stack Engineer

- Engineered e-commerce platform (PHP, JavaScript, REST APIs, MySQL/PostgreSQL).
- Built WooCommerce-FileMaker sync, custom barcode verification, and automation scripts.
- Managed LAMP/LEMP/NGINX stacks on Azure, Kinsta, AWS; supported ~\$50K/month Amazon revenue.
- Implemented Google Analytics/Tag Manager/Ads; earned Google Search Ads certification (2025).
-

1990 – 2016 Various IT & Software Roles

Consultant / Engineer

- Designed and supported enterprise servers, networks, migrations, and custom applications.
- Developed automation in C++, SQL, PHP, and scripting; gained deep systems and scalability expertise.
